

Don Bosco Institute of Technology, Kurla(W)
Department of Electronics and Tele-Communication Engineering
ECL304 - Skill Lab: C++ and Java Programming
Sem III
2021-22

Lab Number:	4
Student Name:	Aniket shrimant pawar
Roll No :	04

Title:

4.1 Write a Java program to Create a class Student with two method getData() and printData(). getData() to get the value from the user and display the data in printData(). Create the two objects s1 ,s2 to declare and access the values from class StudentTest.

4.2 Write a Java program for Basic bank Management System

Learning Objective:

- Students will be able to write C++ and java program for using classes and objects.

Learning Outcome:

- Ability to execute a simple C++ and Java program by accepting and displaying values using functions
- Understanding the classes and objects concept in C++ and Java.

Course Outcome:

ECL304.1	Understand object-oriented programming concepts and implement using C++ and Java
-----------------	--

4.1 Write a Java program to Create a class Student with two method getData() and printData(). getData() to get the value from the user and display the data in printData(). Create the two objects s1 ,s2 to declare and access the values from class StudentTest.

```
import java.util.Scanner;
```

```
class Student {
```

```
    Scanner in=new Scanner(System.in);
```

```
    String name;
```

```
    int roll_no;
```

```
    float cgpa;
```

```
    char div;
```

```
    char branch;
```

```
    void getdata()
```

```
    {
```

```
        System.out.println("Enter your name:");
```

```
        name=in.next();
```

```
        System.out.println("Enter your roll number:");
```

```
        roll_no=in.nextInt();
```

```
        System.out.println("Enter your CGPA:");
```

```
        cgpa=in.nextFloat();
```

```
        System.out.println("Enter your Division:");
```

```
        div=in.next().charAt(0);
```

```
        System.out.println("Enter branch:");
```

```
        branch=in.next().charAt(0);
```

```
}
```

```
void getdata(String n,int r,float c,char d, char b)
```

```
{
```

```
    name=n;
```

```
    roll_no=r;
```

```
    cgpa=c;
```

```
    div=d;
```

```
    branch=b;
```

```
}
```

```
void printdata()
```

```
{
```

```
    System.out.println("Name of the student: "+name);
```

```
    System.out.println("Roll-no of the student: "+roll_no);
```

```
    System.out.println("Cgpa of the student: "+cgpa);
```

```
    System.out.println("Division of the student: "+div);
```

```
    System.out.println("branch of the student: "+branch);
```

```
}
```

```
};
```

```

System.out.println("3.Display");

System.out.println("Enter option");

op=in.nextInt();

}

}

while(ans!='N');

}

}

The screenshot shows a Java program running in a console window titled "Input". The program displays a menu with three options: 1. Deposit, 2. Withdraw, and 3. Display. It prompts the user to "Enter option". The user enters '3'. The program then prompts for "Please enter your account number:". The user enters '3'. The program displays the account details: "Name :siddharthAccount Number:3Account Type:sBalance: 2000Do you want to continue?[Y/N]y". It then prompts for "Enter option". The user enters '2'. The program prompts for "Please enter your account number:". The user enters '3'. The program displays the balance: "Your Balance= 2000Enter amount to withdraw: 500". It then prompts for "Do you want to continue?[Y/N]N". The user enters 'N'. The program finishes with the message: "...Program finished with exit code 0 Press ENTER to exit console."
